**2009-10 Course and Instructor Evaluations - Fall / Winter**

**Instructor Comments**

Unit: Mathematics  
Instructor: Khalkhali, Masoud  
Course: Calculus 1000A <003>  
Session: 1099

In my opinion, Professor Khalkhali is a fair and competent Prof. He explains content material with a strong sense of expertise and consistently uses humour in everyday lectures. He makes the course both enjoyable and educational

Very enthusiastic which makes it easier to understand some course material

Very enthusiastic for every class section

Keep teaching

He is so funny! Enthusiastic, one of my favourite Profs!

The 3rd assignment I considered to be unfair compared to the difficult v/m level of questions displayed in class which is relatively easy. You are really funny, I thoroughly enjoyed your class :)

I like my instructor's teaching method

As I hated all math before this course now I am considering calculus/applied math as a major because of how Professor Khalkhali taught this course. Please teach 1301B. Explain Sumatran a little slower

Sometimes skips steps when showing a solution to a problem. It is hard to follow what he is writing on the board. However he makes calculus very interesting and does a great job explaining the material. Great work Masoud!

Keeps the class up to date in terms of the course outline. Classes don't feel long and boring because somehow he manages to make them funny with his stories and jokes

Very interesting

Good job as a Prof!

Maintains a positive attitude towards course and motivates students to ask questions regularly

No comments he is a good teacher!

This Prof is jokes. His enthusiasm for math is reflected in his teaching and definitely improves understanding as a whole. I wish I could be registered in his class next semester (1301) but will probably attend his lectures regardless

Sometimes puts students on the spot/embarrasses them in front of class. Sometimes when questions are asked he responds: "that so easy why don't you get it??"

An amazing Prof one of the only classes I actually look forward to attending

Very enthusiastic! Can be a bit more organized in terms of lecture teaching

The examples given in class are very informative. I was also impressed that the Prof would not just settle for an answer but asked how the person arrived at that answer. Overall an outstanding instructor

Tell more jokes

He is a very good Prof!

Please teach calculus 1301. Thanks for making calculus so much fun!

He taught the subject very enthusiastically and made us try our best. It was a pleasure having him as our Prof!

He is my favourite Professor I have

Thanks for making this class funny and interesting

Interesting and funny
Thanks for making this course interesting
He presents the material in an enjoyable manner but focuses too much on providing examples rather than explaining the concepts
Moves quickly. Provide more examples. The third assignment had question I felt were unfair
Awesome Prof. You actually made calculus fun!
Be cautious of easy trivial error that end up confusing the class e.g.. Putting a-re sign instead of the biro. Breakdown intermediate calculating more, looks like jumping from step to another, gets confusing.
You make the class extremely enjoyable! However giving class access to the online tutorials would have been nice
Moves very quickly through material. Does not always explain steps to solving problems clearly. Very approachable, enthusiastic about subject, funny and entertaining.
Fun teacher, makes class interesting. Could spend more time focused with students after class
Great teacher who makes calculus fun for all of us! Thanks for a great year!
Very enthusiastic, more assessments might help to track progress, overall class is enjoyable
Allocate more time to students for solving in class questions
Fun, interactive
I love you and I love your shoes!
A very enthusiastic teacher!
One of the funniest Profs ever yet. Also very effective teacher
I've only been to class twice but I loved all 2 times I was here. I'm planning on coming a 3rd time
Great stories! And drawings
Great job
He is really funny and his attitude makes this class fun
I love this guy. He is the best Prof at Western by far
Masoud is a great Prof!
I'm a third year student taking this course and haven't taken calculus in a few years. He helped me get back on track and I didn't feel behind. Classes were interesting and fun so I always attended. I was no shy asking for help, he is very approachable
