

# Exercises on Appendix D

September 14, 2009

(The **bold exercises** are more difficult. The other are straightforward.)

## 1 Not assigned

- Degrees, radians : p.32A; odd 1-11, 17.
- Angles and trigonometric ratios : p. 32A; odd 23-31 (these last two are very similar to classical midterm exam content)
- Find  $x$  : p.32A; 65, **69** (this is also classical exam material)
- Identities : p.32A 51

## 2 Assigned for the 21th of September

Even 24-28, **30** (please write a proof), 46 and 50.
